

GREEN POWER PASS 2023 LETTER OF ATTESTATION

For the calendar year 2023 Iron Mountain procured qualified renewable energy in an amount equal to one hundred percent (100%) of the total Data Center's annual electrical consumption, this includes one hundred percent (100%) of the power delivered by Iron Mountain to Data Center customers.

Scope Calendar Year: 2023

Customer / Account	Site	Address
Greenhost	AMS-1	J.W. Lucasweg 352031 BE Haarlem, Netherlands
<p><i>Iron Mountain represents and assures that we adhere to the FoIP white paper guideline when reporting our own Greenhouse Gas emissions to CDP, RE100, SBT or our GRI reporting. Specifically, we report the energy/carbon impact of customer IT load as our scope 3 and the remaining Data Center's annual electrical consumption as our WRI Scope 2 emissions. Following this protocol ensures that there is no double accounting for scope 2 emissions and carbon reductions.</i></p>
