

Letter of Intent, European Code of Conduct for Energy Efficiency in Data Centers

We, Whiteready srl Benefit Corporation, hereby express our commitment to adhere to the principles and guidelines established by the European Code of Conduct for Energy Efficiency in Data Centers. We recognize the crucial importance of improving energy efficiency in our infrastructures to reduce environmental impact and contribute to a more sustainable future.

As part of our commitment, we propose to:

- **Adopt Best Practices:** Implement the best practices recommended by the Code of Conduct to optimize energy use in our data centers.
- **Monitor and Measure Energy Consumption:** Establish processes for monitoring and measuring energy consumption to identify areas for improvement.
- **Invest in Efficient Technologies:** Invest in technologies and solutions that enhance the energy efficiency of our data centers.
- **Training and Awareness:** Promote ongoing training and awareness among our staff regarding the importance of energy efficiency and sustainable practices.
- **Collaboration and Knowledge Sharing:** Collaborate with other companies in the industry to share knowledge and experiences, thereby contributing to the collective development of best practices in energy efficiency.
- **Adhere to Regulations:** Ensure compliance with all relevant regulations and standards related to energy efficiency in data centers.

Through these actions, Whiteready srl Benefit Corporation aims not only to improve its own energy performance but also to actively contribute to environmental sustainability and the fight against climate change.
